# METROTUNE

An easier way to access tools for musicians!

What is MetroTune?

MetroTune allows the user to tune their intrusment to any pitch, practice to a customizable metronome, and test their note and interval recognition
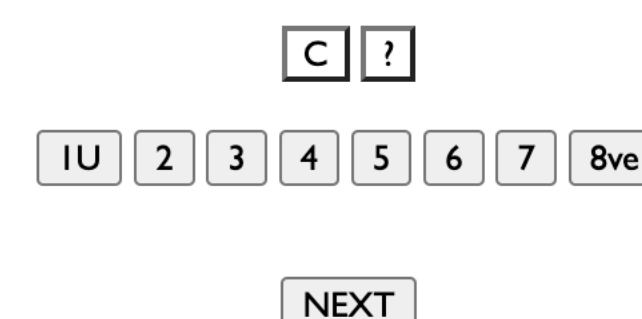

Why use MetroTune?

MetroTune is designed with the user in mind. The minimalist approach to its UI helps the user to utilize the web app with a low skill curve

Features:

MetroTune features a variety of tools including: a tuner, metronome, reference tunings, and pitch tools

Tech Stack:

This project uses JavaScript, HTML, and CSS in conjunction with the ACF2+ algorithm and Web Audio API
