# METROTUNE

An easier way to access tools for musicians!

What is MetroTune?

MetroTune allows the user to tune their instrument to any pitch, practice to a customizable metronome, and test their note and interval recognition
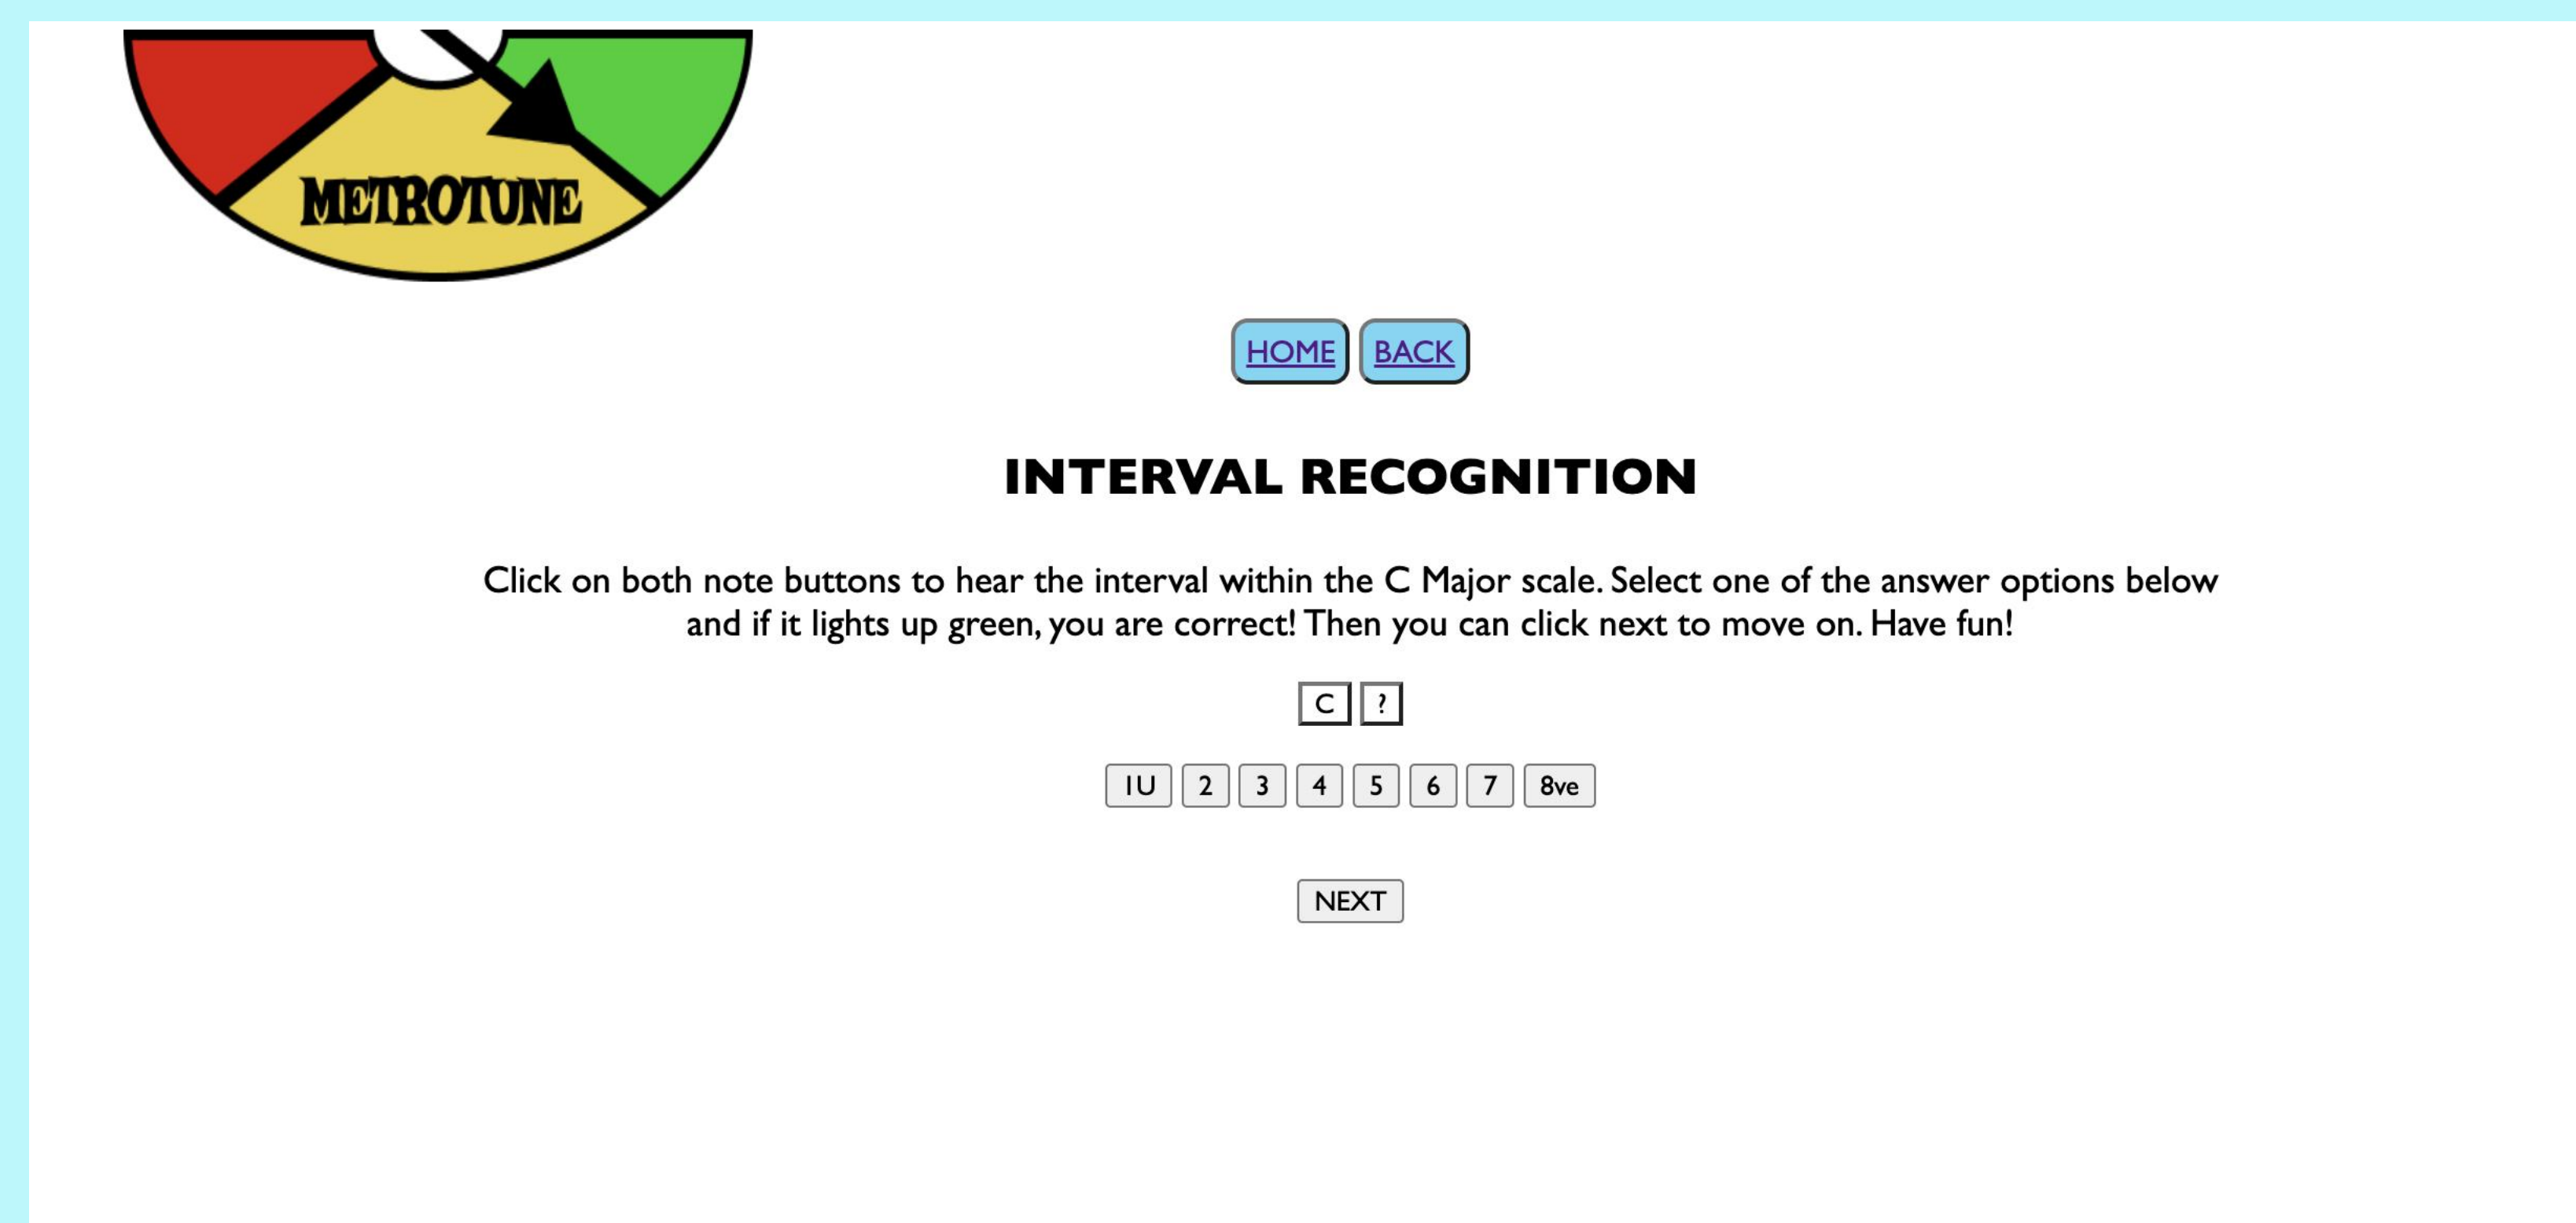

Features:

MetroTune features a variety of tools including: a tuner, metronome, reference tunings, and pitch tools

Why use MetroTune?

MetroTune is designed with the user in mind. The minimalist approach to its UI helps the user to utilize the web app with a low skill curve

INTERVAL RECOGNITION

HOME BACK

Click on both note buttons to hear the interval within the C Major scale. Select one of the answer options below and if it lights up green, you are correct! Then you can click next to move on. Have fun!
